DALHOUSIE UNIVERSITY

Course Title: Object Orientation & Generic Programming
Course Number: CSCI 3132
Course Section: 1
Semester & Year: Winter 2023
Class Day & Time: Tue/Thu 2:35am–3:55am
Class Location: Rowe 1020
Lab Day & Time: Fri 10:05am–11:25am
Lab Location: CHEB C140

Credit Hours: 3.00
Prerequisites: CSCI 2110 and (CSCI 2132 or CSCI 2134)

Instructor: Dr. Derek Reilly
Email: reilly@cs.dal.ca
Office Location: MS Teams
Office Hours: by appointment

TAs: Rowland Goddy-Worlu rowland.goddy-worlu@dal.ca, Reza Soltani (rz636604@dal.ca)

Course Website: on Brightspace
Course Communication: Brightspace announcements will be used for class communication

---

IMPORTANT DATES *

- Final withdrawal dates:
  - ⊡ without academic penalty ("W"): Jan 28
  - ⊡ with academic penalty ("W"): Mar 7
- Reading week (no classes or labs): Feb 21-25
- Quiz dates: Feb 2, Mar 2, Mar 23
- Assignment due dates: Jan 19, Feb 2, Feb 16, Mar 9, Mar 23, Apr 6

* quiz and assignment dates are subject to change; any changes will be posted on Brightspace

COURSE DESCRIPTION

This course deals with the fundamental concepts of object-oriented programming: behaviour, inheritance, encapsulation and polymorphism. There is a discussion of the history of object-oriented programming, and introduction to some currently used object-oriented programming languages.

LEARNING OUTCOMES

- Understand the origins and motivations of object-oriented programming, and how these have influenced modern software development;
- Understand the relationships between the object-oriented programming paradigm and other programming paradigms;
- Develop object-oriented programs in key historical and modern programming languages, and compare syntax and semantics;
- Understand and use object-oriented design patterns;
- Explore the object-oriented foundations of frameworks, components, and generic programming approaches.

COURSE RATIONALE

To strengthen the student's understanding of the theory and practice of object-oriented programming, so that they may employ the paradigm effectively.

COURSE FORMAT AND COMMUNICATIONS

Lectures are held twice weekly. It is expected that students take notes during lectures, the lecture slides are not sufficient study materials on their own. Labs are once weekly and build on lecture topics. Labs and lectures will be recorded.

Course announcements will be posted on Brightspace. It is the student's responsibility to check Brightspace on a regular basis. If you do not know how to access Brightspace please contact the CS help desk or read the information located at: http://www.dal.ca/faculty/computerscience/current.html

TEXTBOOK

There is no required textbook for the course; **assigned readings** will be made available on the course website. Lecture slides will be posted on Brightspace. When applicable, relevant sections of assigned readings will be indicated on lecture slides for your review.

SOFTWARE RESOURCES

Because we will be exploring a number of object-oriented languages and their use in different contexts, it will be important to install and use the recommended tools for your labs and assignments. Instructions for doing so will be made available on Brightspace and support will be provided by the course TAs.

COURSE EVALUATION

Assignments (6)……..... 40% (8% each, best 5 of 6)
Quizzes (3) ……..... 15% (5% each)
Participation ……..……..... 5% (5% readings / in-class participation)
Final Exam ……..... 40%

Notes:

- If a student's combined average over the quiz and exam components is <50%, their final grade will be reduced by a full letter grade
- the participation mark is calculated based asking/responding to questions during lecture and/or writing short responses to assigned readings on Brightspace
- the grade conversion scale in Section 17.1 of the Academic Regulations, Undergraduate Calendar will be used.
- **there will be no conversion of letter grades to PASS/ILL this semester**

QUIZZES AND FINAL EXAMINATION

Quizzes will be held in-class during regular lecture times (dates indicated above). Quizzes last 40 minutes and are *open book*, meaning that your own notes, lecture slides, and assigned readings can be referenced during the quiz (other resources *cannot* be used). Your DalCard (or government-issued photo ID) and laptop must be brought to each quiz.

The final exam will be held during the regular exam schedule for the term and will last 3 hours. The final exam will be closed book and paper based. No dictionaries, notes, calculators, cell phones, PDAs, talking slide rulers, or other electronic aids allowed. The date and location are to be determined.

POLICY ON LATE ASSIGNMENTS

The Student Declaration of Absence policy **does not apply** in this course. Unless otherwise specified, assignments are expected before midnight on the day in which they are due. Each student has 7 late points at the start of the semester, worth a 24-hour extension on any assignment, and more than one late point can be applied to a single assignment. Late points are to be used due to legitimate absences (e.g. illness), and to a lesser extent for work schedule flexibility. Requests for extensions *are not required* if you have sufficient late points remaining. If you use all late points and anticipate further issues with completing work on time, contact the course instructor to discuss your situation.

TENTATIVE CLASS SCHEDULE

***subject to change – Brightspace provides the definitive schedule. See "Important Dates" for due dates.

Week of	Topic	Events	Labs
Jan 9	What is OOP? A brief prehistory. Simula.		No lab
Jan 16	Smalltalk and the Dynabook.	Assignment 1 due	Smalltalk part 1
Jan 23	Smalltalk syntax and semantics, fundamental object relationships.		Smalltalk part 2
Jan 30	Types of polymorphism, intro to C++.	Quiz 1, assignment 2 due	No lab (Munro Day)
Feb 6	C++, relationships to other programming paradigms.		C++ part 1
Feb 13	OOP in C++: classes, inheritance, copy control.	Assignment 3 due	C++ part 2
Feb 20	Reading Week		
Feb 27	Operator overloading in C++.	Quiz 2	Refactoring (C++ example)
Mar 6	Design patterns.	Assignment 4 due	Patterns: event-based systems (Java and C++ examples)
Mar 13	Component models.		Components (JavaBeans)
Mar 20	Object-oriented frameworks.	Quiz 3, assignment 5 due	Frameworks (C++ OpenFrameworks)
Mar 27	Generic programming.		Generics (C++ Standard Template Library)
Apr 3	Review, future(s) of OOP.	Assignment 6 due	No lab

ACADEMIC STANDARDS

Failure to properly attribute sources in your work will be treated as an academic standards issue and points may be deducted for not following citation requirements. For example, forgetting to quote text taken from other sources, failure to include in-text citations, failure to attribute imported software libraries, failure to attribute resources that assisted you in completing a programming assignment, or a failure to include required information in the citations or references. Please see the resources on proper citation provided by the Dalhousie Writing Center (https://dal.ca.libguides.com/c.php?g=257176&p=5001261).

Please note that if it appears that the error was made with intent to claim other people's work as your own such as a lack of both citations and references, an allegation of plagiarism will be submitted to the Faculty Academic Integrity Officer, which could result in consequences such as a course failure.

STUDENT HEALTH AND WELLNESS[1]

Taking care of your health is important. As a Dalhousie student, you have access to a wide range of resources to support your health and wellbeing. Students looking to access physical or mental health & wellness services at Dalhousie can go to the Student Health & Wellness Centre in the LeMarchant Building. The team includes: registered nurses, doctors, counsellors and a social worker. Visit **dal.ca/studenthealth** to learn more and book an appointment today.

Students also have access to a variety of online mental health resources, including telephone/texting counselling and workshops/training programs. Learn more and access these resources at d**al.ca/mentalhealth**.

CULTURE OF RESPECT[2]

Every person has a right to be respected and safe. We believe inclusiveness is fundamental to education and learning. Misogyny and disrespectful behavior in our classrooms, on our campus, on social media, and in our community is unacceptable. We stand for equality. We hold ourselves to a higher standard.

What we all need to do:

1. **Be ready:** promise yourself to not remain silent, know that it will happen again, summon your courage whatever it takes. Practice things to say, open ended is good: "Why did you say that?" or "How did you develop that belief?"
2. **Identify the behaviour:** Use reflective listening, avoid labeling, name-calling or blame. Describe the behaviour, don't label the person: "Kim, what I hear you saying is that …"
3. **Appeal to principles:** this works well if the person is known to you like a friend, sibling, co-worker etc. "Joe, I have always thought of you as a fair-minded person, so it shocks me when I hear you say something like that."
4. **Set limits:** you cannot control another person, but you can control what happens in your space. "Please don't tell racist jokes in my presence anymore" or "This classroom is not a place where I allow homophobia to occur" and then follow through.
5. **Find an ally/be an ally:** seek out like-minded people for support or support others in their challenges. Lead by example and inspire others to do the same.
6. **Be vigilant:** change happens slowly, but be prepared, and keep speaking up. Don't let yourself be silenced.

RESPONSIBLE COMPUTING POLICY

Usage of all computing resources in the Faculty of Computer Science must be within the Dalhousie Acceptable Use Policies (https://cdn.dal.ca/content/dam/dalhousie/pdf/dept/university_secretariat/policy-repository/Acceptable%20Use%20Policy%20Feb%202020.pdf) and the Faculty of Computer Science Responsible Computing Policy (https://www.cs.dal.ca/downloads/fcs_policy_local.pdf)

UNIVERSITY STATEMENTS

This course is governed by the academic rules and regulations set forth in the University Calendar and the Senate. https://academiccalendar.dal.ca/Catalog/ViewCatalog.aspx?pageid=viewcatalog&catalogid=111&chapterid=6817&loadusercredits=False

Territorial Acknowledgement

Dalhousie University is located in Mi'kma'ki, the ancestral and unceded territory of the Mi'kmaq. We are all Treaty people.

Dalhousie acknowledges the histories, contributions, and legacies of the African Nova Scotia people and communities who have been here for over 400 years.

Internationalization

At Dalhousie, 'thinking and acting globally' enhances the quality and impact of education, supporting learning that is "interdisciplinary, cross-cultural, global in reach, and orientated toward solving problems that extend across national borders." https://www.dal.ca/about-dal/internationalization.html

Academic Integrity

At Dalhousie University, we are guided in all of our work by the values of academic integrity: honesty, trust, fairness, responsibility and respect (The Center for Academic Integrity, Duke University, 1999). As a student, you are required to demonstrate these values in all of the work you do. The University provides policies and procedures that every member of the university community is required to follow to ensure academic integrity.
http://www.dal.ca/dept/university_secretariat/academic-integrity.html

Accessibility

The Student Accessibility Centre is Dalhousie's centre of expertise for matters related to student accessibility and accommodation. If there are aspects of the design, instruction, and/or experiences within this course (online or in-

person) that result in barriers to your inclusion please contact: https://www.dal.ca/campus_life/academic-support/accessibility.html for all courses offered by Dalhousie with the exception of Truro.

Conduct in the Classroom — Culture of Respect
Substantial and constructive dialogue on challenging issues is an important part of academic inquiry and exchange. It requires willingness to listen and tolerance of opposing points of view. Consideration of individual differences and alternative viewpoints is required of all class members, towards each other, towards instructors, and towards guest speakers. While expressions of differing perspectives are welcome and encouraged, the words and language used should remain within acceptable bounds of civility and respect.

Diversity and Inclusion — Culture of Respect
Every person at Dalhousie has a right to be respected and safe. We believe inclusiveness is fundamental to education. We stand for equality. Dalhousie is strengthened in our diversity. We are a respectful and inclusive community. We are committed to being a place where everyone feels welcome and supported, which is why our Strategic Direction prioritizes fostering a culture of diversity and inclusiveness (Strategic Priority 5.2). (read more: http://www.dal.ca/cultureofrespect.html)

Student Code of Conduct
Everyone at Dalhousie is expected to treat others with dignity and respect. The Code of Student Conduct allows Dalhousie to take disciplinary action if students don't follow this community expectation. When appropriate, violations of the code can be resolved in a reasonable and informal manner—perhaps through a restorative justice process. If an informal resolution can't be reached, or would be inappropriate, procedures exist for formal dispute resolution. (read more: https://cdn.dal.ca/content/dam/dalhousie/pdf/dept/university_secretariat/policy-repository/Code%20of%20Student%20Conduct%20rev%20Sept%202021.pdf)

Fair Dealing Policy
The Dalhousie University Fair Dealing Policy provides guidance for the limited use of copyright protected material without the risk of infringement and without having to seek the permission of copyright owners. It is intended to provide a balance between the rights of creators and the rights of users at Dalhousie. (read more: https://www.dal.ca/dept/university_secretariat/policies/academic/fair-dealing-policy-.html)

Originality Checking Software
The course instructor may use Dalhousie's approved originality checking software and Google to check the originality of any work submitted for credit, in accordance with the Student Submission of Assignments and Use of Originality Checking Software Policy. Students are free, without penalty of grade, to choose an alternative method of attesting to the authenticity of their work, and must inform the instructor no later than the last day to add/drop classes of their intent to choose an alternate method. (read more: https://cdn.dal.ca/content/dam/dalhousie/pdf/dept/university_secretariat/policy-repository/OriginalitySoftwarePolicy.pdf)

All submitted code may be passed through a plagiarism detection software, such as the plagiarism detector embedded in Codio, the Moss (https://theory.stanford.edu/~aiken/moss/) Software Similarity Detection System, or similar systems. If a student does not wish to have their assignments passed through plagiarism detection software, they should contact the instructor for an alternative. Please note, that code not passed through plagiarism detection software will necessarily receive closer scrutiny. https://cdn.dal.ca/content/dam/dalhousie/pdf/dept/university_secretariat/policy-repository/OriginalitySoftwarePolicy.pdf

Student Use of Course Materials
These course materials are designed for use as part of the CSCI courses at Dalhousie University and are the property of the instructor unless otherwise stated. Third party copyrighted materials (such as books, journal articles, music, videos, etc.) have either been licensed for use in this course or fall under an exception or limitation in Canadian Copyright law. Copying this course material for distribution (e.g. uploading material to a commercial third party website) may lead to a violation of Copyright law.
